

1972 ARTICLE INDEX

MANAGEMENT

- What Makes Japan's Industry So Successful?—J.F. Hird, Jan. p.20.
- Improving Assembly Line Operations Through Operator Motivation, Feb. p.20.
- Monitor and Control Production with a Small Plant-Floor Computer—H.A. Randall and E.L. Rudisill, Mar. p.20.
- Occupational Safety and Health Act Puts New Responsibilities on Managers—G.A. Whittington, Apr. p.20.
- What's Holding Back Automatic Assembly?, May, p.24.
- Manufacturing Managers Must Confront Products Liability, June, p.20.
- Hot to Waste and Misuse Human Capabilities—D.A. Colosky, July, p.34.
- How Can Manufacturing Managers Comply With OSHA Requirements?, Aug., p.16.
- Manufacturer Cuts Costs Fast With Computer Utility Package, Sept., p.20.
- Design the Assembly Workplace To Today's Performance Potential—G.A. Whittington, Oct., p.20.
- Selection and Implementation of a Pre-determined Time System—R.E. Lane and L. Stelter, Oct., p.25.
- Plan Now for A Painless Transition To Metric, Nov., p.20.
- Twentieth JEMC Probes Managerial Productivity, Dec., p.18.

FASTENING & JOINING

- Simple Diagrams Aid in Analyzing Forces in Bolted Joints—G. Meyer and D. Strelow, Jan., p.28.
- How to Calculate Preload Loss due to Permanent Set in Bolted Joints—Part 1—G. Meyer and D. Strelow, Feb., p.30.
- How to Calculate Preload Loss due to Permanent Set in Bolted Joints—Part 2—G. Meyer and D. Strelow, Mar., p.28.
- Core Treatment Cuts Tapping Screw Failure Rate—D.T. Lipari, Apr., p.28.
- 41 Proven Designs for Self-Jigging Brazed Joints—F. Strasser, May, p.34.
- High-Strength Threads for Plastics... The Case for Threaded Inserts, June, p.28.
- A New Discovery For Controlling The Torque/Tension Relationship—T. Green, July, p.42.
- Fatigue Cracks And What To Do About Them—C.R. Smith, Aug., p.22.
- How to Keep Hydrogen Embrittled Fasteners Out of Assembled Products—F.S. Salser and D.R. Kverek, Sept., p.28.
- A Many-Sided Look at One-Sided Fasteners—Part 1—R.E. Smode and R.G. Hawes, Oct., p.34.
- A Many-Sided Look at One-Sided Fasteners—Part 2—F.E. Smode and R.G. Hawes, Nov., p.32.
- Solve Complicated Force Problems With Simple Diagrams—R. Horsch, Dec., p.22.

ELECTRICAL/ELECTRONIC ASSEMBLY & PACKAGING

- Thick Film IC Modules Now in Color TV Sets—G.H. Knox, Jan., p.38.

- Semiautomatic Machines Improve Productivity of Manual PC Assembly, Feb., p.40.
- Wires, Terminals and Connectors in Mechanized Wire Processing—H. Randar, Mar., p.38.
- Automatic Insertion, Thick Film Process Used in New Auto Radios, Apr., p.34.
- Harness Tying Tools Aid Productivity, May, p.46.
- AWS Conference Features The Solder Connection, June, p.36.
- Wave Soldering Tackles New Jobs—P.J. Bud, July, p.52.
- Multifunctional Newcomer: Flat Multi-conductor Cable, Aug., p.30.
- After a Slow Start, Flat Cable is Making Many New Connections, Sept., p.46.
- Cost Reducing Old Products by Using New Technology, Oct., p.48.
- Thick Film Hybrid IC's To Replace PC Boards in Telephone Equipment—G.H. Knox, Nov., p.50.
- Thick Film Hybrids Need High Production To Beat PC Costs—G.H. Knox, Dec., p.26.

ASSEMBLY SYSTEMS

- Kit/Car Saves Space and Time and Improves Managerial Control, Jan., p.46.
- Product Assembly... Getting Hotter For The Hot Melts—Part 1—G.H. Knox, Feb., p.50.
- Product Assembly... Getting Hotter For The Hot Melts—Part 2—G.H. Knox, Mar., p.46.
- The Robots Are Here!—W. Semmerling, Apr., p.42.
- Cut Assembly Costs with Automatic Paste Brazing and Soldering—G. Williams, May, p.52.
- Air Cushions Handle Assembly Line Problems: Heavy Products, Operator Safety, High Productivity—R.R. Kegerreis, June, p.46.
- Solve Soldering Problems with Ultrasonics—F.J. Fuchs, July, p.58.
- How to Test/Calibrate Electronic Assemblies Automatically—B.O. Brekke and R. Gunderson, Aug., p.36.
- How to Achieve Reliability in Fluid Power Lines—Part 1—P. Robinson, E. Dail, and D. Burge, Sept., p.54.
- How to Achieve Reliability in Fluid Power Lines—Part 2—P. Robinson, E. Dail, and D. Burge, Oct., p.60.
- All Pneumatic System Achieves Both High Productivity and Quality—Nov., p.58.
- Taking the Confusion out of Fluid Power Circuit Design—E.L. Holbrook, Dec., p.32.

MANAGEMENT IDEAS

- Red Cross Certification Meets OSHA Requirements, May, p.28.
- Service Call Network Cuts Assembly Downtime, Sept., p.22.
- Computer System Helps Firm Cope With Business Expansion, Nov., p.24.

FASTENING & JOINING IDEAS AND DEVELOPMENTS

- Adhesive Washers Provide Superior Bonding in Hearing Aid Assembly, Mar., p.33.
- New Magnetic Fasteners Have High Corrosion Resistance, May, p.37.
- Progress Report No. 1, The Optimum Metric Fastener System, May, p.37.
- Stud Weld Thin Aluminum Without Distortion, June, p.31.
- Self-Drilling Screws Reduce Assembly Times by 65%, Aug., p.26.
- Threaded Metal Inserts and Plastics Whip Corrosion Problems, Reduce Cost, Aug., p.28.
- How to Set 16 Rivets on 2 Planes in 30 Seconds, Sept., p.31.
- Automatic Nut Installation Saves 26.5% of Aircraft Assembly Costs, Sept., p.36.
- Blind Rivets Hold at 2200°F, Oct., p.40.
- Reflections, Technicalities and Smith-Kabobs, Nov., p.36.
- Metal-Piercing Rivets Can Be Effective in Reducing Costs, Nov., p.37.

ELECTRICAL/ELECTRONIC IDEAS AND DEVELOPMENTS

- Assembly Costs Reduced by Snap-In Circuit Breakers, Feb., p.44.
- Plastic Caps Used As Heat Shields, Feb., p.44.

ASSEMBLY SYSTEMS IDEAS AND DEVELOPMENTS

- Wing Panels are Fastened by Electromagnetic Riveting, Jan., p.48.
- Remove Frozen Bushings with Hydraulic Hammer, Jan., p.50.
- Arbor Press Solves Short-Run Assembly Problems, Mar., p.50.
- Automatic Nailer Drives Cosmetic Case Hinge-Pins, Mar., p.50.
- Special Length Screws are Cut to Size in Multiples, Mar., p.51.
- Punch Hole, Insert Part, and Clinch Assembly in One Operation, May, p.57.
- Laminated Shims Cut Costs in Helicopter Assembly, May, p.58.
- Video Control System Monitors Key Assembly Operations, May, p.59.
- Pipe Plug Thread Sealant Applied in Batch Process, May, p.60.
- MIG Spot Welding and Resistance Welding—The Trade-Offs, June, p.49.
- Fixture Aids Tap Wrapping, June, p.50.
- How to Justify High Speed Equipment for Moderate Production Volumes, Aug., p.40.
- Industrial Robot Takes Hazards out of Assembly Operation, Oct., p.64.
- Modified Tool Scribes Circle Around Hole, Oct., p.64.
- Simple Tool Helps Locate Noise Sources and Flaws, Oct., p.65.
- Simultaneous Assembly Operations Cut Cost 90%, Nov., p.61.
- Minicomputer Controlled Indexing System Cuts PC Card Customizing Costs, Nov., p.62.
- Tool Forms and Cuts Wire in One Operation, Nov., p.64.
